

SOFTWARE ENGINEERING- LAB 02

Problem Statement 52

Name: Raina Kareem

SRN: PES1UG24CS361

Class: 5-F

Date: 08.09.2026

SPRINT 1:

Create all the user stories in the Epic and assign their individual priorities.

1.

The screenshot displays the Jira interface for the 'TEL board'. The main area shows a backlog of 14 user stories, each assigned to an epic. The stories are: TEL-5 (Epic 2: Deposit & F...), TEL-2 (Epic 1: Tool Discov...), TEL-3 (Epic 1: Tool Discov...), TEL-6 (Epic 2: Deposit & F...), TEL-8 (Epic 3: Returns & ...), TEL-9 (Epic 3: Returns & ...), TEL-10 (Epic 1: Tool Discov...), TEL-11 (Epic 2: Deposit & F...), TEL-12 (Epic 3: Returns & ...), TEL-15 (Epic 4: Member N...), and TEL-14 (Epic 4: Member N...). The interface includes a sidebar with navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Roadmaps', 'Plans', 'Spaces', 'Filters', 'Dashboards', 'Teams', 'Goals', 'Projects', and 'Customise sidebar'. The top bar shows the Jira logo, a search bar, and a '+ Create' button. The bottom bar shows the 'Backlog' section with 0 work items and a 'Create sprint' button.

Choose all the stories required for the sprint 1 and assign the story point numbers.

2.

Create active sprint.

3.

Move one task to the Done list and move other tasks in progress.

4.

All tasks are Done.

5.

This is the burndown chart for Sprint 1.

6.

Repeat all the steps done for Sprint 1 for Sprint 2.

1.

2.

This screenshot shows the Jira interface for the 'TEL board' in the 'Tool & Equipment Library' space. The 'Active sprints' tab is selected. The 'TO DO' column contains five items, each with a story title, an epic link, and a task ID:

- Story 3.2 — Log Damage Assessment (Epic 3: Returns & Damage Management, TEL-9)
- Story 3.3 — View Loan History: As a Community Member, I want to view my past loans and returns, so that I can track what I've borrowed and any fees I've paid. (Epic 3: Returns & Damage Management, TEL-12)
- Story 4.1 — Send Due Date Reminder (Epic 4: Member Notifications & Overdue Enforcement, TEL-14)
- Story 2.3 — Refund Deposit: As a Library Custodian, I want the system to release the remaining deposit back to the member after a clean return, so that members get their money back promptly. (Epic 2: Deposit & Fee Calculation, TEL-11)
- Story 4.2 — View Overdue Queue: (Epic 4: Member Notifications & Overdue Enforcement, TEL-15)

The 'IN PROGRESS' and 'DONE' columns are currently empty.

3.

This screenshot shows the same Jira 'TEL board' after moving items. The distribution is as follows:

- TO DO (1 item):** Story 4.2 — View Overdue Queue: (Epic 4: Member Notifications & Overdue Enforcement, TEL-15)
- IN PROGRESS (1 item):** Story 2.3 — Refund Deposit: As a Library Custodian, I want the system to release the remaining deposit back to the member after a clean return, so that members get their money back promptly. (Epic 2: Deposit & Fee Calculation, TEL-11)
- DONE (3 items):**
 - Story 3.2 — Log Damage Assessment (Epic 3: Returns & Damage Management, TEL-9)
 - Story 3.3 — View Loan History: As a Community Member, I want to view my past loans and returns, so that I can track what I've borrowed and any fees I've paid. (Epic 3: Returns & Damage Management, TEL-12)
 - Story 4.1 — Send Due Date Reminder (Epic 4: Member Notifications & Overdue Enforcement, TEL-14)

4.

REFLECTION QUESTIONS:

1. Did your estimations reflect the actual effort?

Yes, the story point estimations generally reflected the actual effort required for the User Stories. Smaller and less complex stories, such as Search Tool Inventory and View Reservation Details, were assigned fewer points, while more complex stories, such as Reserve & Check Out Tool, were assigned higher points. Overall, the estimates provided a reasonable indication of the relative complexity of the work.

2. Was your backlog well-prioritized?

Yes, the backlog was prioritized based on the importance and user impact of each User Story. Core functionalities such as searching for tools, reserving and checking out tools, calculating deposits, and returning tools were given higher priority because they are essential to the tool library system. Less critical supporting features were planned for later.

3. How did your simulated sprint align with your plan?

The simulated sprint aligned well with the planned workflow. The selected User Stories were added to Sprint 1 and the active sprint was created. The tasks were then moved through the required stages, from In Progress to Done, as specified in the lab. Finally, all the planned tasks for the sprint were completed, demonstrating that the sprint execution followed the original plan.

4. What insights did the burndown chart give about your team's capacity?

The Burndown Chart showed how the remaining work decreased as the User Stories were completed during the sprint. It helped us track the team's progress against the planned work and gave an indication of how much work the team was able to complete during the sprint. The chart also showed that the remaining story points decreased significantly as tasks were moved to Done.
